## Neptune launch stunning summer ranges

Neptune provide an extensive range of beautiful pieces of garden furniture at prices that are surprisingly affordable. The attention to detail and high level of design excellence make Neptune the market leader in their field. Whether your garden is traditional or contemporary, large or small, you can rest assured that they will cater for all tastes and budgets.

New for 2012 is the Murano Modular range (below) which offers eight

possible combinations. Each frame is made from thick pieces of aluminium that are welded and powder coated to guarantee its longevity. Neptune craftsmen hand weave using traditional techniques to obtain the beautiful woven finish pictured. The new warm slate luxurious cushions combine

seamlessly with the All-Weather Willow to offer an elegant solution to any garden space.

The prestigious Seattle collection (left) is made from a 3mm resin weave in a chic bark colour and complimented with a toughened glass table top. This range includes two round tables and one ellipse.

Other new ranges include Portland (top), which offers three round tables and one rectangular, and Lucca which comes with an impressive collection of images. Current ranges have also been expanded which includes the recent addition of a 150cm round

table to the Bordeaux collection.
